MAJOR PROJECTS

1**. Best Deals Info - Hello, Discounts   (Cashback Website)**
- This was my dream project that I completed, and it is also earning money
- Developed a cashback website using WordPress

- Implemented features such as user registration, cashback tracking, deal recommendations, Coupon service, and product price Comparison.
- This Website is affiliated with more than 100+ Companies like Myntra, Flipkart, Ajio, Beardo and etc

2 . React-E-commerce
- E-Commerce web application built with React, Tailwind CSS, JSON Server, JWTAuth, Context API and deployed on Netlify/Render
- The application allows users to create an account using their name, email, and password, browse and order products, view their order summary, and access a user dashboard.

3 . Chat Application
- Built a real-time chat application using [React JS / Firebase /API]
- Build Using Context API, Reducer, React Hooks
- Users can create a chat room and chat with random people
- Users can edit their profile
- Sign in with Google and Facebook Account

4 . Box Office (API)
- Developed Box Office application using TVMaze API [HTML, SCSS, JS/ REACT JS]
- Users can search for any Movie and Actor on this Application

5. Tic Tac Toe (GAME)
- Developed a command-line-based Tic Tac Toe game using [React Js / Vite].
- Interactive gameplay with two players taking turns to mark spaces as 'X' or 'O'.
- Winning condition detection to determine when a player has achieved a winning pattern.

6. Code Editor (WEB)
- Built a web-based code editor using [HTML, SCSS, JS / REACT]
- It provides a user-friendly real-time interface for writing and editing HTML, CSS, and JavaScript code.

7. Face Detection + Mask Detection
- Simple GUI base application develop using Python (numpy, h5py, OpenCV, TensorFlow, pillow, etc)
- Collect Face Data, Build Face Classifier, Detecte the face, Detect the mask

8 . Sports Management Website
- Build using HTML, CSS, Bootstrap, React, and NodeJS
- Database administration and website design
- A Sports Management Website to help digitize Thapar University Sports Department.

9. Frontend Gyaan - Web Dev | Coding | Tips and Tricks
- Created articles and tutorials on various front-end development topics.
- Build using WordPress

10. Todo
- Task manager web-application built with React along with theme selection and local storage

---
